The Hamer Model 4000 Upright Bag Conveyor is a smooth-surface conveyor belt with a mechanical splice. This bag handling conveyor is used when hand-bagging with a volumetric filler, net weigh or gross weigh scale. It keeps bags in an upright position and automatically moves them into position to feed into a bag-top sealer. Used with a wide variety of manual bagging operations, the Model 4000 is offered in a variety of lengths and conveyor heights. Adjustable legs for top of belt height. For applications using a range of bag sizes, from 3-5lbs, up to 40-100lbs.

Standard Features Include:

- Slide bed conveyor
- 12" W, 120# black PVC belt
- 8" lag drive pulley; 8" wing take-up pulley
- Single back rail bag guide
- Adjustable H-Legs
- 10 gauge steel formed conveyor bed
- 35 FPM belt speed
- SEW 3/4 HP, TEFC motor
- Start/Stop control in NEMA 12 enclosure

Shown with Optional Swivel Caster Kit
