Bale-A-Matic Bag Holder

Bale Bag Holder

Effective Date: January 1, 2018

Suggested List Prices (\$USD):

| | |
|---|--------------------|
| Model 900-3C (Three head, manual rotating) | \$2,655 USD |
| Model 900-1C (Single head with stand) | \$1,045 USD |

The Hamer Model 900 “Bale-A-Matic” Bale Bag Holder is the most simple, cost-effective way to hold bale bags open during the filling process. The Model 900 series opens and holds poly, paper, mesh or burlap, open mouth and wicketed baler bags up to 20 inches wide. Three rotating stations (Model 900-3C) holds up to 100 wicketed bags each. Operation is simple and easy. An efficient, heavy duty spring system securely holds bags in place. Depress foot pedal to load and unload bags. Depress the pedal again and the bag is released. This quick load and release procedure promotes optimum production speed.

Standard Features Include:

- Single head filling station with stand (900-1C)
- Rotating three head filling station with stand (900-3C)
- Vertically adjustable head
- Portable
- Heavy duty construction - all stress parts made from hardened steel alloys
