

Plain Sew Head

NEW Corrosion Resistant Empress™ Plain Sew Head

The Fischbein Corrosion Resistant Empress™ Plain Sew Head is specifically designed for bagging applications where corrosion protection is required. The Model 100 CR includes stainless steel fasteners, nickel plated external sewing parts and thread guides, and a two step corrosion resistant powder coat finish on the main housing. A replacement for any standard Model 100, it is fully supported with Fischbein corrosive resistant replacement parts.

Model 100 CR™
